EXPERIENCE

ULTRA-X BD LTD | TEAM LEADER
June 2022 – Current

- → Proficient in React.js and Next.js with deep understanding of frameworks, lifecycle methods, hooks, and rendering strategies (SSR, SSG, CSR).
- → Strong command over JavaScript (ES6+), HTML5, and CSS3 for building responsive, high-performance web applications aligned with UI/UX principles.
- → Developed and maintained RESTful APIs and integrated them into full-stack applications using React/Next.js and Node.js.
- → Extensive experience in backend development using Node.js and Express.js, including middleware design, routing, authentication, and error handling.
- → Designed and maintained relational databases using MySQL, ensuring secure and efficient data storage, querying, and retrieval.
- → Followed component-driven development principles to build reusable, maintainable UI components.
- → Skilled in TypeScript for scalable and type-safe application development.
- → Familiar with Tailwind CSS and Shadcn UI for rapid UI prototyping and consistent design systems.
- → Applied OOP principles in both frontend and backend contexts to maintain modular, testable codebases.
- → Used Git and GitHub for version control, team collaboration, and continuous integration workflows.
